ELEPHANT TOKEN

ELEPHANT TOKEN

The Elephant.Money Network's store of value token (BEP-20) on the Binance Smart Chain (BSC) that captures value by having the most fair distribution, an auto-balancing burn mechanism, and by providing a lifetime of frictionless, passive rewards. HODLers of ELEPHANT will receive passive rewards from simply holding the token in their wallet, as every transaction (buy, sell, and transfer) has a 10% fee; 5% which is distributed evenly to all existing token holders, and 5% is added towards locked liquidity. In addition, ELEPHANT is also used as partial redemption collateral for the TRUNK stablecoin, which is minted by providing Binance USD (BUSD). There will be a starting supply of one quadrillion ELEPHANT tokens and distribution will be as the following: 49% sent to the graveyard (burn address with auto-balancing burn mechanism), 1% towards marketing/development, 25% towards contract owned locked liquidity, and 25% towards community participants during liquidity drive event. One unique feature about ELEPHANT versus other reflect token platforms is that typically these platforms setup their burn address as another token holder which passively grows larger and larger overtime. While this may sound good in theory, the net effect is that the burn address ends up eating all the rewards from the rest of the token holders. In ELEPHANT however, the graveyard is a smart contract that rebalances its ownership of the supply to 50% everyday (if deemed necessary). This prevents holders from getting diluted overtime, receiving more rewards and incentivizing longterm strategies!

LIQUIDITY DRIVE EVENT

The initial token distribution takes place as a 1 week liquidity drive event, from 05/04/2021 - 05/11/2021. During this period, participants are able to add BNB as liquidity to get ELEPHANT at the lowest possible cost; as their contribution is not subject to any slippage or exchange fees, which will be factored into future orders on the official exchange listing. The price for each ELEPHANT token is not set, and will be determined by amount of tokens available and the total BNB raised amount after the liquidity event has ended. Once the raising period has concluded, 25% of a quadrillion tokens will be distributed to those who provided liquidity during the drive (split proportionately by their contribution amount). 49% of a quadrillion tokens will be removed from circulation and sent to the graveyard address. 1% will be allocated towards marketing and development purposes and the

remaining 25% will be used to provide locked liquidity onto Pancake Swap for the official listing.

TRUNK

TRUNK

The Elephant.Money Network's partially collateralized stable coin (BEP-20) on the Binance Smart Chain (BSC) that captures value by being backed by a reserve of assets that **guarantees redemption for \$1 USD equivalent** (minus the 1% redemption fee) and can be staked to earn high yield. TRUNK's reserves are backed 75% by Binance USD (BUSD) and 25% by ELEPHANT. In addition to being able to **lock in** your crypto gains, TRUNK allows players to **compound** their earnings by staking their TRUNK to earn passive rewards (with a base APR starting at 30%) from the 1% drip dividend pool. Reward credits are generated on minting and redemption at a rate of 11% and 4% on the mint/redemption volume respectively. These rewards are distributed to the TRUNK staking pool (8% mint/1% redeem), Elephant.Money V2 vault pools (2% mint/1% redeem), and the performance pool (1% mint/redeem). All pools release rewards at 1% of their daily balance. TRUNK also benefits holders of ELEPHANT as 25% of the BUSD used to mint TRUNK is used to buyback ELEPHANT, meaning that the underlying collateral backing TRUNK hardens overtime as the Elephant.Money ecosystem grows.

ELEPHANT TOKEN

The Elephant.Money Network's store of value token (BEP-20) on the Binance Smart Chain (BSC) that captures value by having the most fair distribution, an auto-balancing burn mechanism, and by providing a lifetime of frictionless, passive rewards. HODLers of ELEPHANT will receive passive rewards from simply holding the token in their wallet, as every transaction (buy, sell, and transfer) has a 10% fee; 5% which is distributed evenly to all existing token holders, and 5% is added towards locked liquidity.

REWARDS

Rewards are dividends paid out as TRUNK by the Elephant.Money Stable dividend pool (by the minute). 1% of the dividend pool amount is paid out each day. Payouts received are **proportionate** to the deposited amount of a player and their total stake % of the supply. Rewards also can be rolled, claimed (withdrawn), or left to accumulate overtime. There is **no additional transaction fee** for claiming your rewards into your wallet. You can calculate your **estimated** daily drip pool rewards with the following equation: (Your Stake %) *

(Dividend Pool Amount * 0.01). For example, if a player has a 5% stake, and a dividend pool amount of 18,000 TRUNK = $(0.05) * (18,000 * 0.01) = (0.05) * (180) = \sim 9$ TRUNK daily.

DEPOSITS

Player's current deposit of TRUNK into the staking contract. This can be increased by rolling or making an additional deposit.

STAKE %

Player's current stake percentage of the total supply of deposited TRUNK, which also determines their share of incoming rewards. This will **fluctuate** overtime, **decreasing** as more TRUNK is deposited. You can always **increase** your stake % by rolling or depositing additional TRUNK.

ROLLS

The total number of times that a player has rolled their TRUNK rewards via Elephant.Money Stable.

WITHDRAWN

The total amount of TRUNK that a player has withdrawn via Elephant.Money Stable.

ROLLED

The total amount of TRUNK rewards that a player has rolled via Elephant.Money Stable.

ROLL

Redeposits your current rewards back into the TRUNK staking contract. There is no fee for rolling your TRUNK rewards. Rolling will give you the ability to **compound** your earnings by increasing your stake %, meaning that you will get a larger share of incoming rewards, and also helps **prevent share dilution** overtime. Depending on your position size, it is **recommended** to roll more or less frequently, whenever it makes the most sense economically.

CLAIM

Withdraws your total TRUNK rewards directly into your wallet. There is **no fee** for claiming your rewards (aside from standard gas fees for transactions).

MINT

TRUNK can be minted 1:1 using Binance USD (BUSD). There is a small 1% fee for minting TRUNK that is used 100% towards backing TRUNK with BUSD in a Pancake Swap liquidity pool.

REDEEM

TRUNK can be redeemed at anytime 1:1 for the BUSD redemption price (supplied by 75% as BUSD and 25% as ELEPHANT respectively). There is a small 1% fee for redeeming TRUNK that is sent to the dividend pool and distributed as daily rewards.

STAKE

Deposit TRUNK into the staking contract to earn passive rewards. There is no fee for staking or unstaking your TRUNK.

TRANSFER

Transfers your TRUNK deposit from your account to the recipient address of your choice. There is no transaction fee for transfers.

AIRDROP

Airdrops TRUNK from your account proportionately to all players in the TRUNK native staking pool. This is a great tool to use for giveaways, promotional events, etc.

REDEMPTION PRICE

The current BUSD equivalent received for redeeming TRUNK 1:1. The redemption price also factors in the 1% redemption fee for redeeming TRUNK into BUSD and ELEPHANT.

COLLATERALIZATION RATIO

The current asset ratio of the combined treasuries (Cash and Elephant) to the TRUNK/BUSD liquidity pool (LP) in Pancake Swap. When the ratio exceeds 1, that means there is an excess to pay for the yield and redemption TRUNK in the ecosystem.

PANCAKE LP PRICE

The current BUSD price of TRUNK on the PancakeSwap BUSD/TRUNK LP. When this is above or below 1.00, you can utilize this for profitable arbitrage opportunities. Remember that TRUNK can always be redeemed at the redemption rate regardless of the LP price on PancakeSwap.

ELEPHANT TREASURY

The ELEPHANT treasury is the ELEPHANT reserve of funds that is used to provide partial collateral for TRUNK. Since the Elephant Treasury acts as a large player, it will collect RFI rewards from incoming trading volume from ELEPHANT and **always ensure a collateralization ratio above 1**. This means that players will **always** be able to redeem TRUNK for \$1 USD worth of assets, supplied 75% as BUSD and 25% as ELEPHANT.

CASH TREASURY

The cash treasury is the BUSD reserve of funds that is used to provide partial collateral for TRUNK.

PLAYERS

The total number of players that are participating in the Elephant.Money Stable ecosystem.

SUPPLY

The total number of TRUNK currently in circulation. This amount will **increase** as more TRUNK is minted, **decreasing** as TRUNK is redeemed and burned.

DIVIDEND POOL

The 1% fee for minting and redeeming TRUNK is distributed towards a player dividend pool, which pays out 1% of its balance to all players on a **daily** basis. The rewards that you receive are paid out **proportionately** to your deposited amount and total stake % of the supply. Rewards also can be rolled, claimed (withdrawn), or left to accumulate overtime. There is **no additional transaction fee** for claiming your rewards into your wallet. You can calculate your **estimated** daily drip pool rewards with the following equation: (Your Stake %) * (Dividend Pool Amount * 0.01). For example, if a player has a 5% stake, and a dividend

pool amount of 18,000 TRUNK = $(0.05) * (18,000 * 0.01) = (0.05)*(180) = \sim 9$ TRUNK daily.

STAKED BALANCE

The total amount of TRUNK that is actively being staked in the Elephant.Money Stable staking contract.

TRANSACTIONS

The total number of transactions that have occurred via Elephant.Money Stable.

DEPOSITS TAB

Shows recent player activity for deposits.

WITHDRAWALS TAB

Shows recent player activity for withdraws.

STAMPEDE

STAMPEDE

The Elephant.Money Network's native bonding system that allows players to deposit their TRUNK and earn a **205% APR (672% APY)** from a partially collateralized stable coin. By participating, players bond (burn) their TRUNK and it is split 50/50 between the **ELEPHANT Treasury** and the **ELEPHANT/BUSD PancakeSwap liquidity pool**. Bonding TRUNK ensures that the system as a whole is **taking profit to payout yield for the longterm**, regardless of market condition. Bonds are tied to your wallet and can be added to (or compounded) at anytime. You will earn a **fixed 2.05X your total deposited amount** at a rate of **0.56% per day** (of your total amount deposited) over 365 days. Additionally, increased total value locked (TVL) in Stampede **boosts the APR for native TRUNK staking**. Stampede is a great addition to your crypto portfolio since it allows you to earn a **fixed yield at a low risk** in exchange for hardening the Elephant Treasury. Alternatively, since rewards are paid out as a stable coin, you are able to earn a steady yield **regardless of market conditions**. Stampede is also home to the Herd Partner Network, which is its first of its kind onboarding system that rewards both referrers and referrals equally upon participation (see section titled "The Herd (Partner Program Network)" for more information). Minting bonds is a great hedge that benefits the entire Elephant.Money ecosystem, including ELEPHANT and TRUNK holders alike!

TRUNK

The Elephant.Money Network's partially collateralized stable coin (BEP-20) on the Binance Smart Chain (BSC) that captures value by being backed by a reserve of assets that **guarantees redemption for \$1 USD equivalent** (minus the 1% redemption fee) and can be staked to earn high yield. TRUNK's reserves are backed 75% by Binance USD (BUSD) and 25% by ELEPHANT. In addition to being able to **lock in** your crypto gains, TRUNK allows players to **compound** their earnings by staking their TRUNK in the native pool to earn passive rewards (with a base APR starting at 30%) from the 1% drip dividend pool.

ELEPHANT TOKEN

The Elephant.Money Network's store of value token (BEP-20) on the Binance Smart Chain (BSC) that captures value by having the most fair distribution, an auto-balancing burn

mechanism, and by providing a lifetime of frictionless, passive rewards. HODLers of ELEPHANT will receive passive rewards from simply holding the token in their wallet, as every transaction (buy, sell, and transfer) has a 10% fee; 5% which is distributed evenly to all existing token holders, and 5% is added towards locked liquidity.

BOND

Deposits your TRUNK into Stampede's perpetual bond system. The Stampede toggle must first be enabled to allow you to bond TRUNK. When you deposit your TRUNK, it is **burned** meaning that you will be **unable to withdraw your principal amount**. Instead, you will be paid back at a fixed **0.56% per day (205% APR/672% APY)** from your deposited amount in the form of TRUNK rewards over 365 days. As of the Stampede V4 update, TRUNK that is deposited (bonded) into Stampede is now added in batches to make the process more gas efficient for users. Available Rewards are automatically rolled into deposits if available.

ROLL

Redeposits your current rewards back into the Stampede bonding system. There is no fee for rolling your TRUNK rewards. Rolling will give you the ability to **compound** your earnings and maximize your gains overtime. As of the Stampede V4 update, TRUNK rewards rolled in Stampede is now completed periodically in batches in order to make the process more gas efficient. Depending on your position size, it is **recommended** to roll more or less frequently, whenever it makes the most sense economically.

CLAIM

Withdraws your total TRUNK rewards directly into your wallet. There is a **2.5% fee** for claiming your rewards. The deducted fee is used to **add additional liquidity to the TRUNK/BUSD LP pair** on PancakeSwap, ensuring that available **liquidity scales with the growth** of the Elephant.Money ecosystem. Because the claim function involves interaction with multiple different smart contracts, **gas fees to claim can be relatively high**. For that reason, it is recommended to **claim less frequently** and only when it **makes sense economically**.

AIRDROP

Allows you to airdrop TRUNK from your wallet to a recipient address of your choice as a Stampede bond. Think of this tool as an allowance, grant, etc. as a way to give your family

and friends exposure into the Stampede ecosystem! Alternatively, it can be used by influencers as a promotional tool to give back to the community.

REWARDS

Rewards are dividends paid out as TRUNK by the Elephant.Money treasury. You will receive **2.05X your deposited amount** over the span of 365 days. Rewards can be left unclaimed or claimed and reissued as additional bonds to **hyper compound your earnings** overtime.

PAYOUTS

The payouts are the amount of TRUNK that you have received thus far from your bonds deposited. You will continue to receive payouts until your payout amount matches your maturity amount.

MATURITY

The maturity is the maximum amount of TRUNK that you will receive from your bonds deposited overtime. To increase your maturity amount, it is recommended to deposit fresh TRUNK and roll frequently.

BONDS (STATS TAB)

The total amount of bonds that have been minted by all players via Stampede.

PAYOUTS (STATS TAB)

The total amount of TRUNK payouts received by all players via Stampede.

STABILITY RATIO (STATS TAB)

The percentage of total ELEPHANT liquidity that is backed by BUSD. This amount of liquidity will increase overtime as more users adopt the bonding system since whenever a user claims their rewards, there is a 2.5% fee which adds liquidity to the TRUNK/BUSD LP pair in PancakeSwap.

ELEPHANT/BUSD LP (STATS TAB)

The total amount in USD value that has been allocated to the ELEPHANT/BUSD liquidity pool through the minting of Stampede bonds.

STAMPEDE (OVERVIEW TAB)

The total amount of TRUNK available from the collected batch of deposits/rolls. The batched TRUNK isn't dispersed into the Elephant.Money ecosystem until the "Stampede" function gets triggered. Any community member is able to trigger the function at anytime (and pay the gas fees), which uses the available TRUNK to feed the ELEPHANT treasury and also harden the price of ELEPHANT.

THE HERD (PARTNER PROGRAM NETWORK)

The Herd (Partner Program Network) is the first of its kind onboarding system the benefits both team builders and new participants to the Elephant.Money ecosystem alike. Participation is completely voluntary, however by utilizing the partner network, not only are players rewarded for building out their teams organically, but newcomers are provided equal incentivize to participate. Unlike many other multi-level marketing/scammy referral systems, which consistent of pyramid structures, tiered referral trees, etc. there is **only 1 level of affiliate rewards**, making it most similar to Amazon or Tesla's affiliate system. The Herd's system was carefully and thoughtfully designed, preventing bad actors, need for self-referrals, leeching rewards, etc. Reward credits are issued whenever the **referred individual makes a deposit or rolls in Stampede**. **1%** of the deposited/rolled amount is **split 50/50, or 0.5% each**, between the referred and referrer in the form of airdrops. As of the Stampede V4.1 update, there is **no minimum TRUNK balance** needed in order to benefit from the program. Rewards will be generated as long as you have your partner address set.

OVERVIEW TAB (THE HERD)

The overview tab outlines your individual stat's within the Herd (Partner Program Network) including amount of TRUNK airdrops received, your individual partner address, and the total number of participants on your team. You are not required to participate in the program, however it allows you to leverage your social network to onboard and reward new participants.

PARTNER TAB (THE HERD)

In order to add your own partner to the Herd, you must enter your partners wallet address and click the "Update" button. Once you've set a partner, you will begin to benefit by receiving reward credits whenever you complete a deposit or roll in Stampede. **1%** of the deposited/rolled amount is **split 50/50, or 0.5% each**, between the referred and referrer

(set partner) in the form of airdrops. You are able to update your active partner address at anytime.

CHECKER TAB (THE HERD)

The checker tool allows you to verify if an address is a direct on your Herd team.

STATS TAB (THE HERD)

The stats tab shows total amount of TRUNK airdropped and the total number of participants in the Herd.

ELEPHANT.MONEY VAULTS (RETIRED)

ELEPHANT.MONEY V2 VAULTS (RETIRED)

Elephant.Money is a DeFi (Decentralized Finance) protocol on the Binance Smart Chain whose core offering are multiple single-asset staking pools, where players are able to deposit core supported BEP-20 token assets and earn passive rewards based 100% on community activity. APY's reflected are estimates of both rewards received from the **instant** and **drip dividend pools**, and will **fluctuate** overtime depending on network activity.

List of BEP-20 tokens and their respective use cases that are currently supported by Elephant.Money:

- Wrapped Binance Coin (WBNB)* - Native Token of the Binance Smart Chain & Binance Exchange
- Wrapped Bitcoin (BTCB)* - Blockchain Digital Gold & Store of Value
- Wrapped Ethereum (ETH) - Native Token of Ethereum Network & Decentralized Finance
- Binance USD (BUSD)* - Stable Coin & Decentralized Finance
- bDollar (BDO)* - Algorithmic Stable Coin & Decentralized Finance
- PancakeSwap (CAKE) - DEX Governance & Decentralized Finance
- Additional BEP-20 assets may be added in the future

*WBNB, BTCB, ETH, BUSD, BDO, and CAKE are all BEP-20 tokens that can be acquired from <https://pancakeswap.finance/>. Additionally, Wrapped Bitcoin (BTCB) can be acquired converting normal Bitcoin (BTC) from the Bitcoin Network cross chain using the bridge function on Pancake Swap's exchange or by depositing BTC onto binance.com and withdrawing it as a BEP-20 token to your BSC wallet.

Deposits will **not** fluctuate in value and are pegged 1:1 with WBNB, BTCB, ETH, BUSD, BDO, or CAKE. By making a deposit, players will earn the **stored asset** passively as rewards from the community drip dividend pool, which pays out 2% daily. Elephant.Money allows players able to **compound** the core asset of their choosing, in a future-proof way, **without**

risk of impermanent loss or any **rug pulls**. The code for the smart contracts on Elephant.Money are fully **open source** and **verified** on bscscan.com. They are also in the process of a formal audit from certik.org and the progress can be viewed at <https://certik.org/projects/elephant>.

REWARDS

Rewards are dividends paid out as stored assets by the Elephant.Money dividend pool (by the minute). 2% of the dividend pool amount is paid out each day. Payouts received are **proportionate** to the deposited amount of a player and their total stake % of the supply. Rewards also can be rolled, claimed (withdrawn), or left to accumulate overtime. There is **no additional transaction fee** for claiming your rewards into your wallet. You can calculate your **estimated** daily drip pool rewards with the following equation: (Your Stake %) * (Dividend Pool Amount * 0.02). For example, if a player has a 5% stake, and a dividend pool amount of 100 WBNB = $(0.05) * (100 * 0.02) = (0.05) * (2) = \sim 0.1$ WBNB daily.

DEPOSITS (STORED ASSETS)

Player's current deposit of stored assets. This can be increased by rolling or making an additional deposit.

STAKE %

Player's current stake percentage of the total supply of deposited stored assets, which also determines their share of incoming rewards. This will **fluctuate** overtime, **decreasing** as more stored assets are deposited. You can always **increase** your stake % by rolling or depositing additional store assets.

WITHDRAWN

The total amount of stored assets that a player has withdrawn via Elephant.Money.

ROLLED

The total amount of stored assets rewards that a player has rolled via Elephant.Money.

DEPOSIT

Makes a stored asset deposit into Elephant.Money. There is a 10% fee on deposits that are distributed as the following: 8% towards the drip dividend pool and 2% distributed towards ELEPHANT token holders via buyback.

WITHDRAW

Withdraws a player's deposited stored assets. There is a 10% fee on withdraws that are distributed as the following: 8% towards the drip dividend pool and 2% distributed towards ELEPHANT token holders via buyback.

ROLL

Redeposits your current rewards back into Elephant.Money. There is a 10% fee on rolls that are distributed as the following: 8% towards the drip dividend pool and 2% distributed towards ELEPHANT token holders via buyback. Rolling will give you the ability to **compound** your earnings by increasing your stake %, meaning that you will get a larger share of incoming rewards, and also helps **prevent share dilution** overtime. Depending on your position size, it is **recommended** to roll more or less frequently, whenever it makes the most sense economically.

CLAIM

Withdraws your total stored assets rewards directly into your wallet. There is **no fee** for claiming your rewards (aside from standard gas fees for transactions).

TRANSFER

Transfers your stored asset deposit from your account to the recipient address of your choice. There is no transaction fee for transfers.

SUPPLY

The total number of stored asset token deposits currently in circulation. This amount will **increase** as more tokens are bought, **decreasing** as tokens are withdrawn and burned.

REWARDS (TOTAL)

The total amount of stored asset rewards that have been claimed by all players in Elephant.Money.

DIVIDEND POOL (STORED ASSETS)

8% of the stored assets from Elephant. Money deposits, withdraws, and rolls are distributed towards a player dividend pool, which pays out 2% to all players on a **daily** basis. The rewards that you receive are paid out **proportionately** to your deposited amount and total stake % of the supply. Rewards also can be rolled, claimed (withdrawn), or left to accumulate overtime. There is **no additional transaction fee** for claiming your rewards into your wallet. You can calculate your **estimated** daily drip pool rewards with the following equation: (Your Stake %) * (Dividend Pool Amount * 0.02). For example, if a player has a 5% stake, and a dividend pool amount of 100 WBNB = $(0.05) * (100 * 0.02) = (0.05) * (2) = \sim 0.1$ WBNB daily.

CONTRACT BALANCE

The total amount of stored assets held in the Elephant. Money smart contract. This amount includes the stored assets in the dividend drip pool, outstanding rewards, and the assets balance backing the 1:1 token peg.

DEPOSITS TAB

Shows recent player activity for deposits.

WITHDRAWS TAB

Shows recent player activity for withdraws.

LEADERBOARD TAB

Shows leaderboard information the of top 100 Elephant. Money holders including their wallet address, deposited balance, and stored asset rewards.
